

N-GEN MATH[®]

GEOMETRY

BY KIRK WEILER

UNIT #1 – BEGINNING CONCEPTS 11

- Lesson 1 – Points, Lines, and Segments
- Lesson 2 – Circles and Arcs
- Lesson 3 – Rays and Angles
- Lesson 4 – Types of Angles
- Lesson 5 – Pairs of Angles
- Lesson 6 – More Pairs of Angles
- Lesson 7 – Angle Bisectors and Perpendicular Lines
- Lesson 8 – Additional Geometric Terminology
- Lesson 9 – Parallel Lines
- Lesson 10 – Copying a Triangle
- Lesson 11 – Geometry in the Coordinate Plane
- Unit 1 – Beginning Concepts – Unit Review

UNIT #2 – RIGID MOTIONS AND CONGRUENCE 63

- Lesson 1 – Transformations
- Lesson 2 – Rotations – Day 1
- Lesson 3 – Rotations – Day 2
- Lesson 4 – Point Reflections
- Lesson 5 – Line Reflections
- Lesson 6 – Isosceles Triangles

UNIT #2 – RIGID MOTIONS AND CONGRUENCE (CONT.) 63

- Lesson 7 – Perpendicular Bisectors
- Lesson 8 – Translations
- Lesson 9 – Congruence and Rigid Motions
- Lesson 10 – Symmetry
- Unit 2 – Rigid Motions and Congruence – Unit Review

UNIT #3 – EUCLIDEAN TRIANGLE GEOMETRY 113

- Lesson 1 – The Triangle Inequality
- Lesson 2 – Congruent Triangles
- Lesson 3 – Drawing Inferences from Geometric Givens
- Lesson 4 – The Side-Side-Side Theorem
- Lesson 5 – The Side-Angle-Side Theorem
- Lesson 6 – The Angle-Side-Angle Theorem
- Lesson 7 – The Properties of Equality
- Lesson 8 – Proofs with Partitioning
- Lesson 9 – Parallel Lines and Proof
- Lesson 10 – Exterior Angles
- Lesson 11 – Proving Lines are Parallel
- Lesson 12 – AAS and Isosceles Triangles
- Lesson 13 – The Hypotenuse-Leg Theorem
- Lesson 14 – Additional Triangle Proof
- Unit 3 – Euclidean Triangle Geometry – Unit Review

UNIT #4 – CONSTRUCTIONS 179

- Lesson 1 – Introduction to Constructions
- Lesson 2 – Copying Angles and Creating Parallel Lines
- Lesson 3 – Constructing Translations

UNIT #4 – CONSTRUCTIONS (CONT.) 179

- Lesson 4 – Bisecting an Angle
- Lesson 5 – Constructing a Perpendicular to a Line
- Lesson 6 – Constructing Reflections
- Lesson 7 – Constructing Rotations
- Lesson 8 – The Circumcircle and Its Center
- Lesson 9 – The Inscribed Circle and Its Center
- Lesson 10 – The Orthocenter of a Triangle
- Lesson 11 – Inscribing Regular Polygons in Circles
- Unit 4 – Constructions – Unit Review

UNIT #5 – COORDINATE GEOMETRY 235

- Lesson 1 – Slope and Parallel Lines
- Lesson 2 – Slope and Perpendicular Lines
- Lesson 3 – The Slope-Intercept Form of a Line
- Lesson 4 – The Point-Slope Form of a Line
- Lesson 5 – Horizontal and Vertical Lines
- Lesson 6 – The Pythagorean Theorem
- Lesson 7 – The Distance Formula
- Lesson 8 – The Midpoint Formula
- Lesson 9 – Rotations in the Coordinate Plane
- Lesson 10 – Reflections in the Coordinate Plane
- Lesson 11 – Sequences of Rigid Motions
- Unit 5 – Coordinate Geometry – Unit Review

UNIT #6 – QUADRILATERALS 289

- Lesson 1 – Quadrilaterals
- Lesson 2 – Special Quadrilaterals
- Lesson 3 – Parallelograms – Day 1
- Lesson 4 – Parallelograms – Day 2

UNIT #6 – QUADRILATERALS (CONT.) 289

- Lesson 5 – The Midpoints of a Triangle
- Lesson 6 – Rectangles
- Lesson 7 – Rhombuses
- Lesson 8 – Squares
- Lesson 9 – Isosceles Trapezoids
- Lesson 10 – The Symmetries of Quadrilaterals
- Unit 6 – Quadrilaterals – Unit Review

UNIT #7 – DILATIONS AND SIMILARITY 339

- Lesson 1 – Dilations
- Lesson 2 – Dilations in the Coordinate Plane
- Lesson 3 – Dilations and Angles
- Lesson 4 – Similar Figures
- Lesson 5 – Similarity Criteria
- Lesson 6 – Reasoning with Similarity
- Lesson 7 – More Similarity Reasoning
- Lesson 8 – The Side Splitter Theorem
- Lesson 9 – Partitioning a Line Segment
- Lesson 10 – The Medians of a Triangle
- Lesson 11 – Partitioning the Hypotenuse with an Altitude
- Lesson 12 – Geometric Means
- Lesson 13 – Proving the Pythagorean Theorem (No Homework Assignment)
- Unit 7 – Dilations and Similarity – Unit Review

UNIT #8 – RIGHT TRIANGLE TRIGONOMETRY 403

- Lesson 1 – Similar Right Triangles
- Lesson 2 – The Trigonometric Ratios

UNIT #8 – RIGHT TRIANGLE TRIGONOMETRY (CONT.) 403

- Lesson 3 – Trigonometry and the Calculator
- Lesson 4 – Solving for Missing Sides Using Trigonometry
- Lesson 5 – Applying Right Triangle Trigonometry
- Lesson 6 – More Applications of Trigonometry
- Lesson 7 – The Area Formula of a Triangle
- Lesson 8 – The Special Right Triangles
- Unit 8 – Right Triangle Trigonometry – Unit Review

UNIT #9 – CIRCLE GEOMETRY 445

- Lesson 1 – Circle Terminology
- Lesson 2 – Inscribed Angles
- Lesson 3 – More Work with Inscribed Angles
- Lesson 4 – Intersecting Chords
- Lesson 5 – Tangents to Circles
- Lesson 6 – Tangents, Secants, and Their Angles
- Lesson 7 – Tangent and Secant Proofs and Practice
- Lesson 8 – Secant and Tangent Lengths
- Lesson 9 – Equations of Circles
- Lesson 10 – Placing a Circle in Standard Form
- Lesson 11 – Constructing Tangents
- Lesson 12 – Equations of Tangent Lines
- Unit 9 – Circle Geometry – Unit Review

UNIT #10 – GEOMETRIC MEASUREMENT AND MODELING 507

- Lesson 1 – Perimeter
- Lesson 2 – The Circumference of a Circle
- Lesson 3 – The Areas of Polygons

UNIT #10 – GEOMETRIC MEASUREMENT AND MODELING (CONT.) 507

- Lesson 4 – Areas of Similar Figures
- Lesson 5 – The Area of a Circle
- Lesson 6 – Exploring the Circle Area Formula (No Homework Assignment)
- Lesson 7 – Sectors of Circles
- Lesson 8 – Solids and Their Cross Sections
- Lesson 9 – Volumes of Right Prisms and Cylinders
- Lesson 10 – Volumes of Pyramids and Cones
- Lesson 11 – Spheres
- Lesson 12 – Density
- Lesson 13 – Geometric Modeling
- Unit 10 – Geometric Measurement and Modeling – Unit Review
